Pinking Lettuce

Teaching Ideas

This activity is a comprehension exercise which links with the learning objectives of testing common gases. The web-link provides further information and activities related to food science and careers.

Students could research to find out the composition of air and that of MAP products. This data could then be displayed in different ways such as tables, pie charts and bar charts.

Answers

Across

4. shelf life
5. oxidation
6. map
7. oxygen

Down

1. carbon dioxide
2. hydrogen
3. respiration
