

DEADLY VOLCANOES!

© Jeannie Scott / NERC

Across

- 1 Silicic (7)
- 3 Subsurface lava (5)
- 8 Icelandic volcano! (16)
- 10 Volcano responsible for the largest eruption of the 20th century (9)
- 13 Caribbean volcano, erupted in 1902 (5)
- 14 Aka "mudflow" (5)
- 18 Pyroclastic flow deposit (10)
- 19 Quantified emissions (4)
- 21 Highly silicic lava (8)
- 22 Volcanic projectile (4)
- 23 Volcano with gentle slopes (6)
- 24 Sicilian volcano (4)
- 25 This rock can float on water (6)
- 27 Intermediate lava (8)

Down

- 2 Small, regular explosive style (9)
- 3 Largest volcano on Earth (5,3)
- 4 Airborne particles (3)
- 5 Deadly, fast-moving cloud (11,4)
- 6 Typically effusive eruption style (8)
- 7 Region over a mantle plume (7)
- 9 Acidic cloud where lava meets the sea (4)
- 11 Costa Rican volcano (4)
- 12 Volcano of layered lava and pyroclastics (10)
- 15 Explosive eruption of basalt, fire -- (8)
- 16 Glowing cloud (4,7)
- 17 Volcano name meaning "fire" (5)
- 20 Erupted 18th May 1981, Mount -- (2,6)
- 26 Largest known volcano, Olympus -- (4)
