

Digital Files - Read Me First

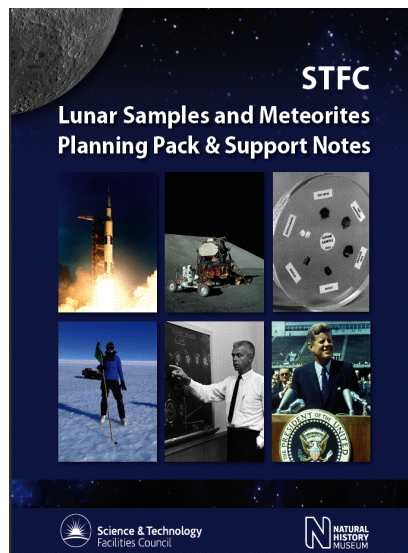

These files contain everything you need for the kit loan. The activity sheets will need printing off and some will need cutting into cards.

There are four main loan kits: Blue, Green, Beige, and Black

The Black kit has different meteorite samples and you need to print the alternative pages 3 & 4 from the book.

A fifth specialist kit, the Orange Kit is for university level loans. These materials do not relate to the Orange kit.

The book in the kit is also included here as a PDF file

The *external files* folder contains videos and presentations from third party sources that are freely available on the internet. They are reproduced for non-profit educational use only. The files are also available on the website www.schoolscience.co.uk. Look in the partners tab for STFC and find the resource for Lunar Rocks.
